DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 3, 5-10, 12 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

Claim 1 and 7 recites, inter alia, "a first value representing a first number of times by which data transfer is performed from the first memory to the second memory, the first value being determined based on a number of bits of data being output from the first memory and a storage capacity of the second memory", "a second value representing a second number of times by which data transfer is performed from the first memory to the second memory, the second value being determined based on an amount of data being stored in the first memory and being transferred to the second memory and the number of bits of data being output from the first memory", "controlling transferring of the data from the first memory to the second memory in accordance with the first value" and "outputting an interrupt signal when a value accumulating a number of times data is transferred from the first memory to the second memory reaches the second value". Prior art of record do not teach or suggest, either alone or in combination, the aforementioned limitation, nor would it be obvious to modify those references to include such limitation. Examiner notes that although prior art of record teaches various values representing the number of times by which data transfer is performed from a first memory to the second memory and exerting an interrupt when

the number of transferred reach these values, prior art of record does not teach that the first and second values are determined based on the criterions as claimed by applicant.
